Summary

Full stack developer and MCA student with hands-on experience building scalable web applications using React, Next.js, and Node.js. Experienced in API integration, bug fixing, and collaborative development through real-world projects and internships, with a strong interest in clean architecture and continuous learning.

Skills

Programming Languages : Python, JavaScript
Frameworks : HTML5, CSS3, Tailwind CSS, React, Django
Databases : MySQL, MongoDB
Tools : Git, GitHub, AWS Cloud, FAST API, Postman
Soft Skills : Communication, Teamwork, Collaboration

Internship Experience

Globentix Technologies, Bengaluru, India

Jan 2026 - Feb 2026

Full Stack Developer Intern | Remote

- Assisting in the design, development, testing, and maintenance of 2 web and software application modules, collaborating daily with a cross-functional development team.
- Identified and resolved 10+ bugs and issues, supported API and third-party service integrations, and followed Git-based version control and code review best practices.

BizoGreat, Patna, India

Apr 2024 - Jun 2024

Web Development Intern | Hybrid

- Enhanced UI/UX performance by improving 10+ front-end components and successfully integrated multiple REST APIs to implement interactive and user-focused features.
- Collaborated within a development team of 4+ members to deliver innovative, concept-driven web projects that enhanced user engagement and functionality.

Education

Vellore Institute of Technology, Bhopal, India

Jul 2024 – Present

Master of Computer Applications – CGPA: 8.27 / 10.00

Aryabhatta Knowledge University, Patna, India

Jul 2021 – Jun 2024

Bachelor of Computer Applications – CGPA: 8.22 / 10.00

Projects

Newstonic - Real-Time News Aggregator | [Link](#) | [Demo](#)

- Technologies: React, Next.js, JavaScript, HTML, Tailwind CSS
- Integrated a public news API to deliver 8+ live news categories with optimized performance and responsive design.

Swapify - Secondhand Marketplace | [Link](#) | [Demo](#)

- Technologies: Next.js, React, Tailwind CSS, Node.js, Express.js, MongoDB, RESTful APIs, Google OAuth, JWT
- Applied OOP, SDLC, and System Design concepts to develop a scalable full-stack application with clean architecture.
- Built a responsive marketplace application featuring real-time chat and geolocation, improving user engagement by 40%.

MoodTunes - AI-Powered Mood-Based Music Recommender | [Link](#) | [Demo](#)

- Technologies: React (Vite), Tailwind CSS, Framer Motion, face-api, Radix UI, ESLint
- Created using React with 95%+ mood detection accuracy via selfie or manual input, boosting user engagement by 2x.
- Suggested music across 5 emotions using real-time analysis using the Pre-trained CNN model (MobileNetV2)
