Summary

Software Developer and MCA student with hands-on experience building scalable web applications using React, Node.js, and Express.js. Skilled in cloud-based application development and DevOps practices, delivering scalable real-world solutions through industry internships. Focused on clean architecture, performance optimization, and continuous learning.

Skills

Programming Languages: Java, JavaScript

Frameworks: HTML5, CSS3, Tailwind CSS, React, Node.js, Express.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, AWS Cloud, RESTful APIs, Postman, Selenium

Soft Skills: Communication, Teamwork, Collaboration

Internship Experience

Software Developer Intern | Globentix Technologies

Jan 2026 – Mar 2026

- Built complete React frontend with 14 components and 8 pages using modern JavaScript and TailwindCSS.
- Integrated 25+ REST API endpoints with FastAPI backend for authentication and real-time dashboard functionality.
- Architected 4 DynamoDB tables and Lambda functions for scalable data management on AWS.
- Deployed and tested full-stack application on EC2 instances with VPC networking using microservices architecture.

Projects

Newstonic - Real-Time News Aggregator Application | [Link](#)

- Tech Stack: React (Vite), Tailwind CSS
- Integrated third-party REST APIs to deliver 8+ live news categories with optimized performance and responsive design.

MoodTunes - AI-Powered Mood-Based Music Recommender | [Link](#)

- Tech Stack: React (Vite), Tailwind CSS, Framer Motion, CNN model, TensorFlow.js, Radix UI, ESLint
- Developed a React-based application achieving 95%+ mood detection accuracy via selfie or manual input.
- Recommended music across 5 emotional states through real-time analysis powered by a CNN model (MobileNetV2).

Swapify - Secondhand Marketplace Platform | [Link](#)

- Tech Stack: React, Tailwind CSS, Next.js, Node.js, Express.js, MongoDB, RESTful APIs, Google OAuth, JWT, Digital Ocean
- Applied OOP, SDLC, and System Design principles to develop a full-stack application following clean architecture practices.
- Built a scalable marketplace platform featuring real-time chat and geolocation, improving user engagement by 40%.

Open Source Contributions

- **GirlScript Summer of Code (GSSoC 2025):** Contributed to the VigyBag repository by fixing a responsive navbar issue on mobile and tablet devices, improving navigation usability, resulting in 1 successfully merged pull request. | [Link](#)
- **IIT Kharagpur Winter of Code (KWOC 2025):** Implemented Dark/Light mode switching in the sf-website repository to enhance user experience and accessibility, resulting in 2 successfully merged pull requests. | [Link](#)

Education

Master of Computer Applications (MCA)

Jul 2024 – Present

Vellore Institute of Technology, Bhopal, India | CGPA: 8.27 / 10.00

Bachelor of Computer Applications (BCA)

Jul 2021 – Jun 2024

Aryabhatta Knowledge University, Patna, India | CGPA: 8.22 / 10.00

Certifications and Achievements

- Solved 150+ problems on LeetCode | [Link](#)
- AWS Cloud Foundations - Amazon Web Services | [Link](#)
- Google IT Support Professional Certification - Coursera | [Link](#)
